

REPORT

Accessibility Report

SITE http://nmsu.edu	GROUP ICT: Shopcart
-------------------------	------------------------

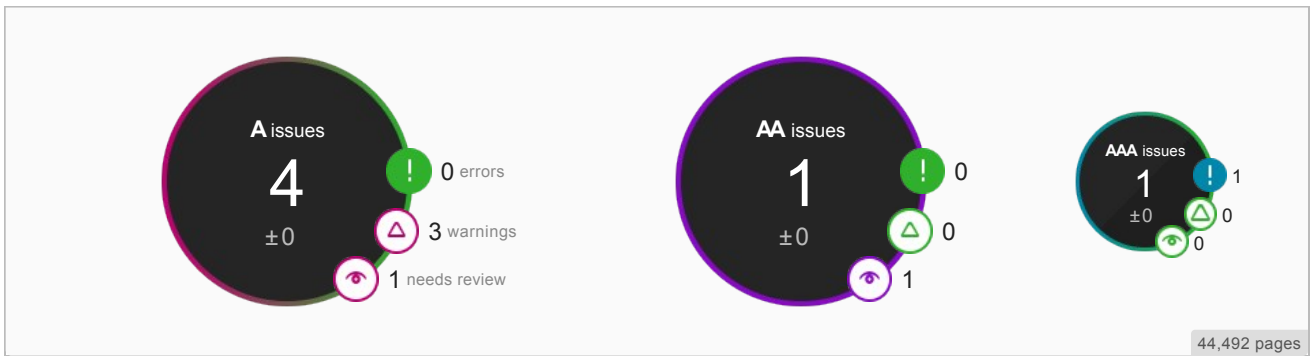

This report provides an overall accessibility status of the chosen website:

- Number of issues by conformance level (A, AA, AAA) in total and as a history graph
- Complete list of issues on your website by severity level ('Errors,' 'Warnings,' and 'Reviews')
- 10 top level / most viewed pages with accessibility issues
- 10 PDFs with accessibility issues (requires activation of PDF scanning feature)

For help understanding icons and terms, refer to the glossary at the end of this report.

Website - Overview and issues by numbers

Errors, warnings and reviews across your whole website displayed by conformance level (A, AA, AAA), with a progress number indicating an increase or decrease since the last crawl.

Website - Issue history

An overview of the number of issues found for each conformance level across the website.

Website - Total number of issues

List of all issues across your website for all levels of conformance, ordered by conformance level and severity.

A	
 Skip repeated content	6 pages
 Structure headings	1 page
 There is no top level heading (H1) on the page	1 page
 Provide enough time	6 pages
AA	
 Text in image	6 pages
AAA	
 Headings are not nested properly	1 page

10 Top page level/popular pages with issues

Ten top level pages with accessibility issues. If the site has Siteimprove Analytics integration, these pages are ordered by page views over the last 7 days.

The numbers shown reflect instances of issues for a particular page.

Page title	A	AA	AAA	Page level
 NMSU: https://reports.nmsu.edu/features	4	1	1	6

10 PDF-files with issues

Ten PDFs with the most accessibility issues. If the site has Siteimprove Analytics integration, these PDF files are ordered by clicks over the last 7 days.

No PDFs with Accessibility issues found

Glossary

- **Accessibility issues:**

All issues that have been found by the accessibility tool and cause difficulty for users with disabilities to access your website effectively. There are three categories of accessibility issues:

- Error (it is a problem)
- Warning (it is almost certainly a problem)
- Manual review needed (Running an automatic check to determine whether the guideline has been met is not possible, so manual review is needed)

- **Conformance levels: Level A, AA & AAA:**

Official levels of accessibility compliance as defined by the Web Content Accessibility Guidelines (WCAG) version 2.0.

- Level A is considered to include the fundamental elements of accessibility
- Level AA is considered to be the next level of importance (typically the standard requirement in most countries)
- Level AAA is considered to be the final level of importance (100% AAA compliance may not be possible with certain types of content)

- **WCAG:**

Web Content Accessibility Guidelines. WCAG 2.0 is the second and most modern version of the accessibility guidelines, created by a group called the Web Accessibility Initiative (WAI), a part of the World Wide Web Consortium (W3C). The WCAG 2.0 guidelines are internationally-recognized and used in legislation and considered best practice in countries worldwide.

WCAG 2.0 was published as a W3C Recommendation on 11 December 2008. The Siteimprove Accessibility tool checks to this standard.
